### **Interview Summary**

1. The examiner's telephonic interview conducted with applicant's attorney Edward W. Yee on November 15, 2007 was initiated by the examiner; thus, the interview was informal, and the issue finally did not go through. Therefore, the interview summary was ineffective.

### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with applicant's attorney Edward W. Yee on 11/13/2008.

The application has been amended as amended as follow:

Claim 1, line 9, the phrase " the size of the n-type transistor and the size of the ESD protection system collectively are less than the size of a single n-type transistor adapted to comply with both the operational requirement and the ESD requirement" **change to** "the **area** of the n-type transistor the **area** of the ESD protection system collectively are less than the **area** of a single n-type transistor adapted to comply with both the operational requirement and the ESD requirement".

Claim 9, line 8, the phrase "wherein the size of the n-type transistor and the size of the means for protecting the circuit collectively are less than the size of a single n-type transistor adapted to comply with both the operational requirement and the ESD requirement" **changes to** "wherein the **area** of the n-type transistor and the **area** of the means for protecting the circuit collectively are less than the **area** of a single n-type transistor adapted to comply with both the operational requirement and the ESD requirement".

Claim 17, line 9, the phrase "the size of the n-type transistor and the size of the one of the NMOS transistor and the PMOS transistor collectively are less than the size of a single n-type transistor adapted to comply with both the operational requirement and the ESD requirement" **changes to** "the **area** of the n-type transistor and the **area** of the one of the NMOS transistor and the PMOS transistor collectively are less than the **area** of a single n-type transistor adapted to comply with both the operational requirement and the ESD requirement".

***Allowable Subject Matter***

3. Applicant's arguments filed 8/4/2008 with respect to claims 1, 9, and 17 have been fully considered and found persuasive. As a result, claims 1, 3-9, 11-20 are allowed over prior art of record.

The following is an examiner's statement of reasons for allowance:

The prior art of record neither anticipates nor obvious the claimed subject matter of the instant application as a whole with taken alone or in combination, in particular, prior art of record does not teach:

“the area of the n-type transistor the area of the ESD protection system collectively are less than the area of a single n-type transistor adapted to comply with both the operational requirement and the ESD requirement” as recited in claim 1,

“the area of the n-type transistor and the area of the means for protecting the circuit collectively are less than the area of a single n-type transistor adapted to comply with both the operational requirement and the ESD requirement” as recited in claim 9, and

“the area of the n-type transistor and the area of the one of the NMOS transistor and the PMOS transistor collectively are less than the area of a single n-type transistor adapted to comply with both the operational requirement and the ESD requirement” as recited in claim 17 respectively.

Claims 3-8, 11-16, 18-20 are also allowed as being directly or indirectly dependent of the allowed independent base claims.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DANNY NGUYEN whose telephone number is (571)272-2054. The examiner can normally be reached on 8:00-4:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, MICHAEL SHERRY can be reached on 571-272-2084. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
